

Mobile Application

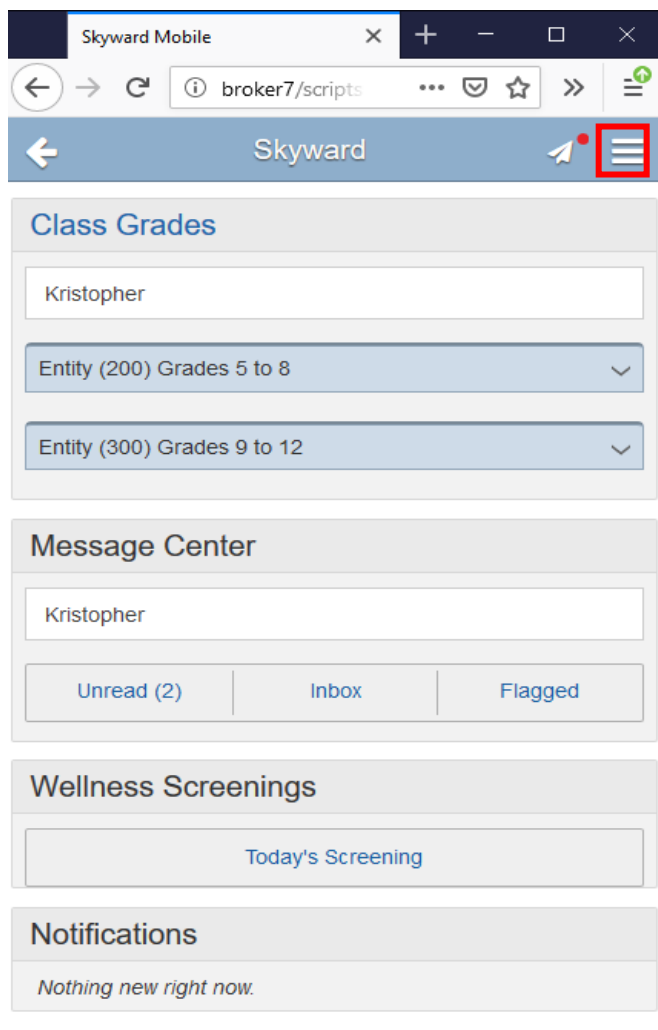

The Wellness Screening option from the Mobile application allows guardians, students, and staff to complete a COVID-19 survey. Based on the survey results, it either approves or prohibits entry for the individual.

To download the Mobile App you can search for Skyward Mobile App using the following depending on what type of phone you have:

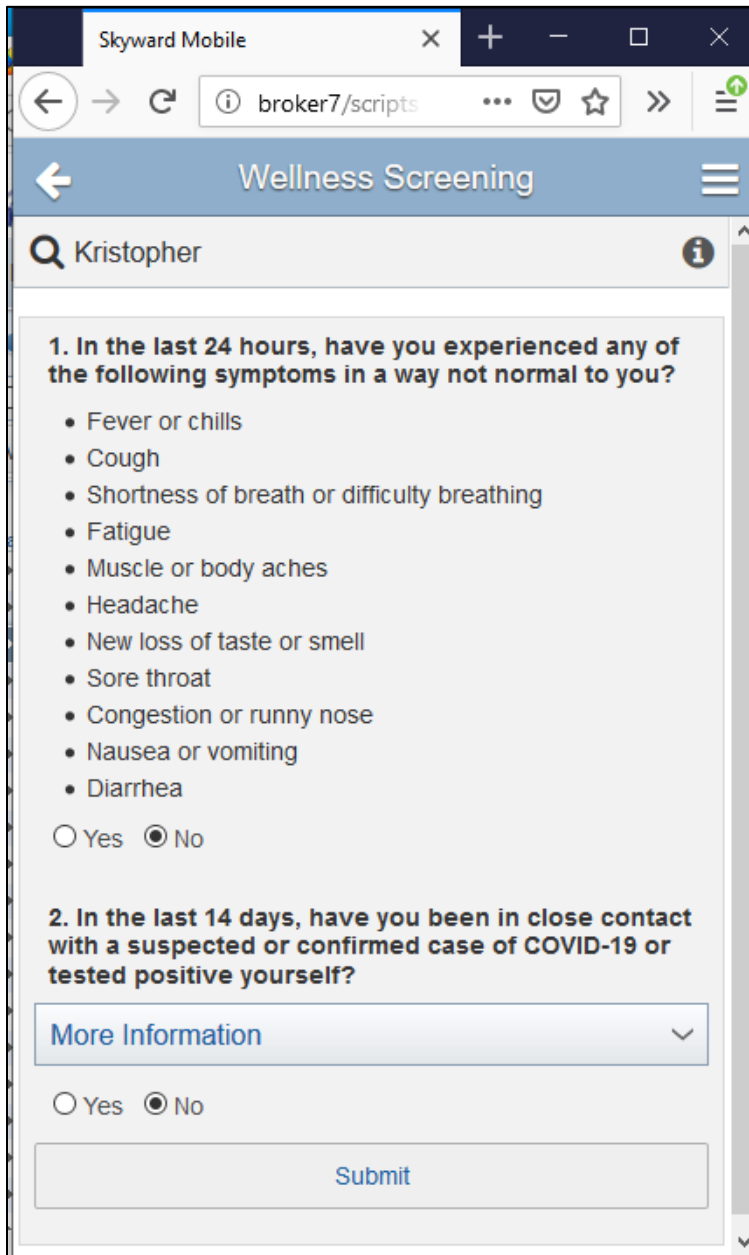

[Itunes App Store](#)
[Google Play](#)
[Amazon App Store](#)
[Windows Phone Store](#)

Once downloaded, you will enter your School District and use the username and password provided by your district to access the App.

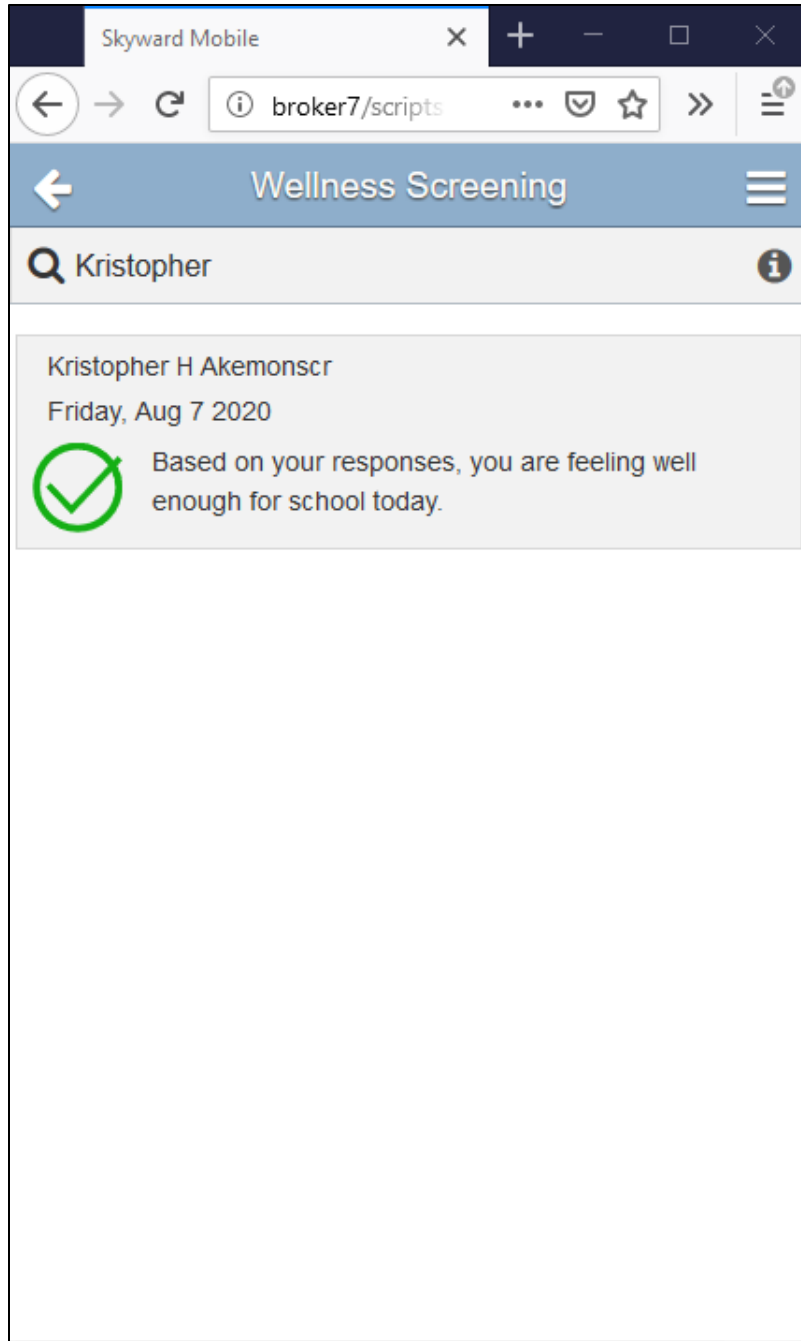

A widget displays on the Mobile home page and it may also be accessed via the menu outlined in red in the picture below, you will see Wellness Screening on this page.

Under the heading Wellness Screening, select the Today’s Screening option.

Answer the two questions and select Submit. Note in this example, “No” was selected for both questions.

Immediately after clicking Submit, a response will display. If you respond “no” to both questions, you will receive a message confirming entry to the school building. If not, you will receive a message advising them not to enter the building.

Below is an example of "Yes" response to both questions.
